

Specialist Inspection Training

FTA's Specialist Inspection Training courses cover all the elements required to teach your staff the appropriate skills to comprehensively evaluate the condition of vehicles, giving you greater peace of mind that you are complying with your O licence undertaking.

Training is carried out by FTA's qualified and experienced vehicle engineers, either at your premises, thereby reducing downtime, or at an FTA training venue. The three-day courses are aimed at engineers tasked with inspecting vehicles, in accordance with O licence requirements, and are tailored to meet individual and company needs. The courses are available on a one to one basis or for groups of up to five delegates.

By ensuring your inspectors receive the correct training, you will benefit from a reduction in maintenance costs through correct wear and tear evaluation, minimise failures at roadside and annual checks and have increased confidence that you are operating safe, legal and reliable vehicles.

Your legal obligations

As part of your O licence obligations, your declaration to ensure your vehicles are maintained to a roadworthy standard means you have agreed to undertake regular inspections. This undertaking includes both Drivers' Daily Walk Round Checks and Preventative Maintenance Safety Inspections. These maintenance inspections can be carried out in-house or subcontracted. If carried out in-house the person conducting the inspections must be competent. In addition all inspection records/reports should be kept as part of your O licence compliance. FTA's specialist inspection training will provide your staff with the knowledge and skills required in order to conduct these inspections to the highest standard.

What do the courses cover?

Vehicle inspection standards

- The need to inspect vehicles
- Legal requirements
- Inspection manuals as appropriate
- Inspection procedures
- Report writing
- Practical training and wear assessments
- Passenger safety, where applicable

Why choose FTA?

- Tailored courses to meet the individual needs of sectors and vehicle types
- 130 qualified vehicle engineers
- Wealth of knowledge in vehicle inspections
- Over 40 years of experience in vehicle inspections
- Training carried out at your convenience
- Training can be done on-site or at FTA training venues
- Leading authority on all freight transport issues
- FTA services underpinned by expert knowledge of freight transport legislation, due to industry representational activities

"FTA and Arriva International have devised a tailor made series of interactive training courses for delivery in six languages to support and underpin one of our core brand values of safety within our pan European engineering function."

Tony Williamson
Director of Operational Support
Arriva International
