

Fire Safety Awareness and Risk Assessment

Who should attend

This course is designed for employees and employee representatives who are responsible for the company's fire risk considerations.

Key benefits

This course provides candidates with the appropriate training to be able to identify the causes and characteristics of fire, the basic principles of fire prevention and the ability to carry out general fire risk assessment. They will also have practical experience of using various fire fighting appliances. Every year fire claims lives and costs millions of pounds; it kills, injures and destroys property and business. All places of work must comply with fire safety law and are required to follow the regulations and guidelines as laid down in the Regulatory Reform (Fire Safety) Order 2005.
