

## On Demand

FTA can also offer the following courses on demand. If you are interested in attending any of the courses listed below, please contact the Member Service Centre on 08717 11 22 22\* for more details.

### Managing Distribution Costs

#### 3 day course

Designed to provide managers with a good understanding of budgeting, accounting principles, forecasting, budget preparation and management cost control techniques for practical application within the transport and distribution environment. At the end of the course delegates will be in a position to understand and prepare departmental budgets, apply current management techniques to monitor and control costs and business performance, develop an on-going strategy for improving cost performance through identifying best practice and apply cost forecasting principles to the business environment.

### Vehicle Fleet Management

#### 2 day course

Designed to enable candidates to implement a system to meet the operating needs of a business, introduce proven management techniques for the forecasting and control of fleet operating costs and understand the wider issues of fleet management and the importance of statutory compliance.

### Warehouse Operations Planning

#### 2 day course

Designed to improve candidates understanding of matters relating to the safe and effective operation of warehouses and familiarise them with the differing operational aspects of various warehouses. This course also includes awareness of the inter-dependence of operational functions, an overview of a number of inventory management techniques, recognition of the relationship between stock levels and a clearer understanding of the service, training on the latest tools and techniques to improve business performance, effective utilisation of workshop resources, road transport legal framework, financial planning, budgeting and cost control, workshop and vehicle costing.

### Logistics Strategy

#### 2 day course

Designed to provide candidates with an opportunity to consider strategic issues for their own companies, this workshop and case study-based course encourages candidates to create a range of ideas for development and implementation, with the potential to make a real difference to their companies.

### Light Vehicle Fleet Management

#### 2 day course

Designed to enable candidates to design a strategy to meet the operating needs of a business, this course gives delegates a structured approach to light vehicle fleet management techniques.

### Introduction to Finance

#### 1 day course

Designed to provide managers within the logistics function, who are not accountants, with a good understanding of company finance issues, this course includes financial and budgeting essentials, profit and loss and budget development for greater financial performance.

### Finance for Senior Managers

#### 2 day course

Designed to provide senior managers with a greater understanding of financial matters in order to make a greater contribution to the financial wellbeing their organisation, this course is a progression for the Introduction to Finance.
