

Lift Truck Safety Supervisor

Who should attend

This course is designed for managers, supervisors, safety representatives who are responsible for lift truck operations within the work place.

Key benefits

This course is designed to meet the requirements of the lift truck approved code of practice. This states that employers must ensure that their supervisors are trained to an appropriate level so that they can recognise safe and unsafe practices. The causes of lift truck accidents and how to reduce risk by implementing and monitoring safe systems are covered.

Course content

- The law
- Employers' and employees' responsibilities
- Accidents
- Liability
- Operator training and safety code
- Application of the approved code of practice
- Implementing safe systems of work
- Authorisation of competent persons
