

# Train the Trainer – Safe, Environmentally and Fuel Efficient Driving

Our instructors have been professionally trained and are DSA/RTITB/ADI registered as driving instructors.

## Who should attend

This course is designed for candidates involved in training drivers to address driving practices that are safer, more environmentally conscious and fuel efficient.

## Key benefits

- Cost effective way of cascading training throughout the company
- Improvements in fuel consumption
- Reduction in vehicle accidents and incidents
- Reduction in costs associated with vehicle maintenance
- Increase company driver standards
- Improve road safety awareness and company safety culture
- Reduce environmental pollution
- Raise the company profile
- Improve driver retention by investing in training

## Course content

- Licence and vehicle checks
- An assessment drive, identifying the competence of the driver and gaps in their safe and fuel efficient performance
- A classroom review session, illustrating key improvement areas and further instruction
- A second drive applying the techniques and coaching the driver's performance
- Driver responsibilities; safety and environmental
- A final feedback session, developing an action plan and a discussion on the programme
- Teaching practices

## Venue/dates

This course is delivered in-company. Please call 08717 11 22 22\* to discuss your training requirements. Please note that a fuel consumption monitoring system is required.

## Course duration

2 days

## Price

£710 + VAT per full day (maximum 2 delegates). Vehicle must have 3 seats if 2 delegates.
